

AMENDMENT TO THE SPECIFICATION

Please replace the title with the following:

"METHOD OF MAKING A MASCARA COMPOSITION COMPRISING A
POLYAMIDE POLYMER AND AT LEAST ONE POLYMER CONTAINING HETERO-
ATOMS AND AT LEAST ONE INERT FILLER AND METHODS OF USE"

Please amend the Abstract as follows:

A physiologically acceptable, in particular mascara, cosmetic composition
containing comprising at least one liquid fatty phase which comprises at least one
structuring polymer, such as a structuring polymer, chosen from polymers of following
formula (I):

in which n denotes a number of amide units, such that the number of ester groups
represents from 10% to 50% of the total number of ester and amide groups; R¹ is, in
each case, independently an alkyl or alkenyl group having at least 4 carbon atoms; R²
independently represents, in each case, a C₄ to C₄₂ hydrocarbonaceous group,
provided that 50% of the R² groups represent a C₃₀ to C₄₂ hydrocarbonaceous group;
R³ independently represents, in each case, an organic group provided with at least 2

carbon atoms, with hydrogen atoms and optionally with one or more oxygen or nitrogen atoms; and R^4 independently represents, in each case, a hydrogen atom, a C_1 to C_{10} alkyl group or a direct bond to R^3 or another R^4 , so that the nitrogen atom to which both R^3 and R^4 are bonded forms part of a heterocyclic structure defined by R^4-N-R^3 , with at least 50% of the R^4 groups representing a hydrogen atom and at least one inert filler.

~~Said polymer is in particular a polyamide. This composition is more specifically an anhydrous lip composition or an anhydrous foundation.~~

Please amend this application on page 1, line 1, by inserting the following new paragraph:

This is a continuation of Application No. 10/203,018, filed August 5, 2002, which is an entry into the national phase of PCT Application WO 02/47625, filed December 12, 2001, and PCT/IB00/02000, filed December 12, 2000, all of which are incorporated herein by reference.
